Cor Euser wins Supercar Challenge championship 2014 with Öhlins

Congratulations to Lotus Evora GT4 driver Cor Euser for winning the Supersport division of the Supercar Challenge 2014.

The very experienced racing driver was the whole season deeply impressed about the performance of his Öhlins TTX36IL dampers specially prepared by the Dutch Öhlins service center Madeno and equipped with optional Öhlins patented Blow-off high frequency pistons.
