CUSTOM 43 / BLACKLINE FRONT FORK

PART NO CUSTOM 43: FG 620 • **PART NO CUSTOM 43 BLACKLINE:** FG 621

Öhlins offers a 43 mm conventional universal fork to any custom bike builder that wants to give the bike supreme suspension performance. With the Custom 43 / Custom 43 Blackline you also get the familiar Öhlins Racing design in black or the well-known Öhlins gold version.

Inside the fork we use the well proven and known NIX-technology which features compression damping in the left leg and rebound damping in the right leg. This allows stable damping characteristics due to positive pressure build up and a more precise adjustment, since the separated circuits don't affect each other. You'll find adjustment for compression, rebound and spring preload easily accessible at the top caps.

This fork delivers stable characteristics while ensuring great bump absorption to give the rider a smooth and comfortable ride. The fork bottoms are delivered without brake caliper and fender mountings, this enables the fork to be easily adapted to various models by the bike builder.

FEATURES

- > NIX-technology
- > Separate compression and rebound adjustment
- > Spring preload adjustment
- > Spring rate 9,5 N/mm
- > Range of optional spring rates available
- > Stroke: 130 mm
- > Length: 800 mm
- > Triple clamp diam. 43 mm
- > Wheel axle 32 mm
- > Setting can be changed via Öhlins Service Centers
- > Serviceable and rebuildable
- > 2 years warranty
