## MOTORCYCLE 2015

## CHOOSING AN ÖHLINS SHOCK IS SIMPLE... SINCE WE HAVE MADE THE CHOICE FOR YOU!

Based on your bike's performance, its price and available mounting space we have designed a shock that we think suits it, both when it comes to price and performance.

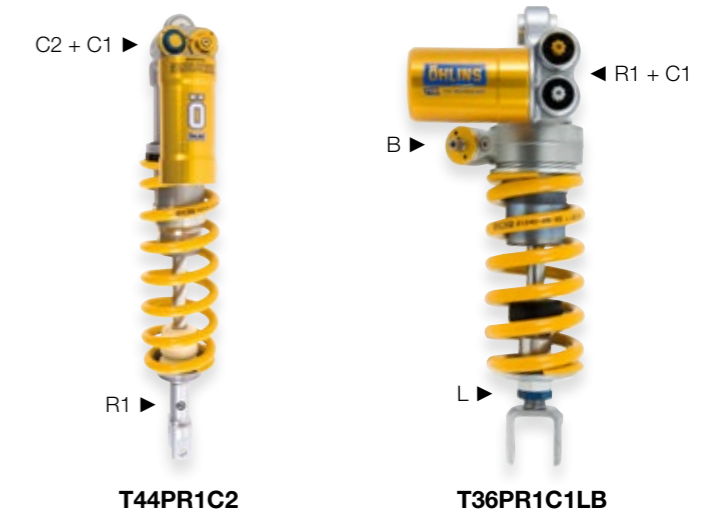

We start by choosing a type which we tailor make for your specific bike. The basic setup, the design of the shim stacks and the calibration of the adjusters, is tested both on road

and track. They are the results of true tests with your bike and no guesswork!

Öhlins manufactures more than 300 different shock absorber models, each model is tailor made for one specific bike. The concept of all Öhlins products is not a secret, it is precision. Precision provides superior control of the damping force and the key to our success.

## SHOCK ABSORBERS - TYPES & ADJUSTMENTS

Start with finding out which shock absorber fits your bike. Then, identify which type of shock absorber it is and which adjustment features it has according to the table below.

### SHOCK ABSORBER TYPE

-  **S, T**  
Single or twin tube design.
-  **30, 36, 39, 44, 46 and 50mm**  
Piston diameter
-  **E**  
Emulsion type of shock absorber.
-  **D**  
Monotube high pressure gas type of shock absorber with internal reservoir in the main body.
-  **P**  
Monotube high pressure gas type of shock absorber with external "piggy back" reservoir.
-  **H**  
Monotube high pressure gas type of shock absorber with hose mounted external reservoir.
-  **Q1**  
Progressive damping shock absorber with two pistons.
-  **W**  
Shock absorber delivered without spring.

### ADJUSTMENT FEATURES

-  **C1**  
Adjustable compression damping. Adjuster wheel or slot on the reservoir.
-  **C2**  
Adjustable high- and low- speed compression damping. Hexagon or slot on the reservoir.
-  **C4**  
Electronically Controlled (EC) compression damping adjuster.
-  **R1**  
Adjustable rebound damping. Adjuster wheel or slot above the end eye.
-  **R1**  
Adjustable rebound damping. Adjuster wheel or slot on the reservoir.
-  **R4**  
Electronically Controlled (EC) rebound damping adjuster.
-  **S**  
Hose mounted hydraulic spring preload adjuster.
-  **S1**  
Electronically Controlled (EC) hydraulic spring preload adjuster.
-  **B**  
Integrated hydraulic spring preload adjuster. Adjuster wheel or hexagon on the adjuster.
-  **L**  
Adjustable length.
-  Mechanical spring preload adjuster.

## TYPE S46P

S46PR1C1W S46PR1C1 / S46PR1C1Q1 S46PR1C1L S46PR1C1LB

## TYPE S46P

S46PR1C1S S46PR1C1S S46PR1C1LS S46PR1C2 S46PR1C2L S46PR1C2B S46PR1C2S S46PR1C2LB S46PR1C2LS

Note! Your shock absorber may look different from the one on the image above. The reservoir may be angled to fit your bike and a horizontal reservoir is used on some models.

## TTX GP

This is the latest Öhlins shock absorber for sport and hypersport bikes. The already famous and high performing TTX shock goes to a new level with the latest valving technology from MotoGP. The TTX GP shock is now available for most bike models used in national racing as well as the latest street bikes.

- TTX technology, twin tube technology
- No risk of cavitation
- Solid piston
- Rebound and compression adjustment straight from MotoGP
- Adjustment needles with different flow restriction behavior to improve chassis feedback
- New main piston
- Wider and more precise adjustment range
- Adjustment possible by hand or with hexagon tool
- Completely separated functions for rebound and compression damping
- Easy to change settings, based on Öhlins setting bank

## TTX RT

The TTX Road & Track is developed for the latest hypersport models as a complement to the top of the line TTX GP shock. The TTX RT has a competitive price but still offers great performance for the road and track day enthusiast. The shock is based on the TTX36 with its race proven technology.

- TTX technology
- Wide adjuster range
- Completely separated functions for rebound and compression damping
- All adjustments are done on the cylinder head of the shock absorber
- Length adjustable for most models

## STX46

Öhlins product base rests on the successful 46 mm single tube shock absorber family. The settings are individually tested on each bike application to suit the bike model in particular. The shocks are also designed with different features depending on what we find most useful to the bike application. Comfort and performance in symbiosis, mixed with the traditional Öhlins values.

- Öhlins design
- Always individually tested on every bike application
- Full maintenance capability
- Setting library available through every Öhlins service center
- A wide range of spring rates available

## STX36

The smaller bikes and also motorcycles with twin shock absorbers usually have less space to fit a STX46 shock. Then the STX36 family is the perfect choice. We have them available in the cleanest design as well as fully adjustable with a lot of clickers and adjusters. It does not matter if you ride a Harley Touring bike or a scooter - We have a S36 shock available.

- Öhlins design
- Always individually tested on every bike application
- Full maintenance capability
- Setting library available through every Öhlins service center
- A wide range of spring rates available
- Spring colors in black, yellow and chrome available to all custom bikes and Harley Davidson

## FGR300

The improved FGR300 is the very essence of front fork technology. Fully packed with technical solutions and experiences from MotoGP and World Superbike, improvements include a more robust design and increased adjustment possibilities.

- Pressurised TTX25 Cartridge technology
- New stronger outer tube top
- Shorter reservoir tubes
- Improved adjustment features
- Fully engaged top out spring as an option
- Different settings available from Öhlins setting bank

## FGRT200-SERIES

The Road & Track front fork with loads of performance and fantastic comfort. A winner on race tracks as well as a fantastic upgrade to improve the ride on your favourite roads. Features the Öhlins 30mm cartridge kit inside, compression and rebound adjustments easily done with compression adjustment in one leg and rebound adjustment in the other leg.

- Öhlins NIX 30mm Cartridge Kit inside
- Compression damping in one leg, rebound in the other
- Weight and stress optimized fork bottom design
- All adjustments at the top of the fork
- Reduced weight
- Proven in various racing applications
- Available for all major Hypersport models
- Different settings available from Öhlins setting bank

### TTX25 PRESSURIZED CARTRIDGE KIT

- Pressurized system for highest performance
- External rebound, compression and spring pre-load adjustment
- Setting library available for individual preferences
- 3 sets of springs are included in the kit, more spring rates available as spare parts

### NIX30 CARTRIDGE KIT

- External rebound, compression and spring pre-load adjusters
- Easy to change settings for individual preferences, based on our existing setting bank
- Wide range of spring rates available in the 08790-series
- Easy installation and service
- Available to all hypersport bikes, and also to many adventure bikes (see FKA kits)

### STEERING DAMPER

- Unique design
- Fluid under pressure to avoid free play
- Adjustable in 16 clicks
- Six lengths/strokes
- Can be mounted outside the fork leg or across the frame behind the triple clamp
- Kits complete with mounting brackets available for certain bike models
- Universal parts for race bikes available

# FORK PISTON KIT - FPK

The Fork Piston Kit is a big improvement to the front fork feel and performance. Each kit contains two complete sets of pre-assembled compression and rebound pistons, including shims and one-way valves. The FPK is easy to install and fits bolt-on without modifications to the original front fork. For bikes not in the list, our global service centers can tune the OEM forks by using any of the Universal Front Fork piston kits.

## UNIVERSAL FG324/F424 FRONT FORK

A 43 mm upside down fork designed with custom builders in mind. Clean fork bottoms without a brake caliper design for applications with a left side brake only.

- 43 mm fork • Fully adjustable • Black and gold design • Setting can be changed with help from Öhlins Service Center

## UNIVERSAL RWU 43 FRONT FORK

Öhlins offers a 43 mm conventional universal fork for any custom builder that wants to give the bike supreme suspension yet classic style and at the same time get the familiar Öhlins Racing design.

- 43 mm fork • Fully adjustable • Black and gold design • Setting can be changed with help from Öhlins Service Center

## FKC100-SERIES CARTRIDGE KITS

Front end upgrade for the FLH and FLT Touring Baggers. This NIX-kit has rebound damping in one leg and compression damping in the other. This kit has been designed with a focus on vehicle control and a smooth ride.

- 25 mm pistons • Öhlins NIX technology • Aluminum damping tubes • Optional spring rates • Improved feel, control and comfort • Easy to install

## STX36 & STX36 BLACKLINE SHOCK ABSORBERS

Öhlins shock absorbers for Harley-Davidson and Custom are now available in two different designs, but with the same superior Öhlins comfort and performance underneath.

- Well proven monotube design • Designed for comfort and rideability • Each application tested and tailor made to suit • Wide range of spring rates are available

By using Öhlins TTX shock absorbers and the NIX technology on front forks, we can add electronic adjustments to the motorcycle suspension. To make a true improvement, the algorithms used to control the chassis balance, need to be at a very sophisticated level. Since we develop our own software based on motorcycle chassis knowledge since 40 years, we can make true semi active suspension to more and more bike models. It is as if you had an Öhlins technician onboard during the ride, adjusting the clickers.

We also develop our own suspension control units (SCU) as well as our own Man Machine Interface (MMI) – the Öhlins Dashboard.

## SUSPENSION CONTROL UNIT - SCU

No semi active suspension is better than its algorithms that control the adjusters. The Öhlins SCU reads different bike parameters, such as throttle control, speed, braking etc. If available on the bike, also movement sideways, lean angles and so on, from the bike sensor box. All signals are taken into consideration, and the best click setting for the riding situation at the moment, is adjusted.

Needless to say, the Öhlins SCU are designed to fulfill automotive standards in terms of temperature, vibrations, moisture and dirt. CAN bus communication is used whenever possible on the bike application.

## KAWASAKI ZX-10R

Since 2013, the Ninja comes with a semi active steering damper ex-factory. For track day riders and high level racers that want to use the electronically controlled steering damper, we offer a race SCU. The Algorithms used in the Race SCU, give racing performance to the steering damper. Not for highway use!

The TTX36 EC shock absorber is also available to the ZX-10R, with semiactive control, totally based on riding behavior. If you ride calm, you get a lot of comfort and if you ride very fast you get the racing setting to match your riding style. The Öhlins Race Wiring harness, is intended to be used in combination with the Kawasaki Racing tuning kit.

## ÖHLINS DASHBOARD

Depending on application, we can also offer the Öhlins Dashboard as MMI to control the suspension adjustment. The Öhlins Dashboard utilize a touch screen that can be controlled while riding – with gloves – to change riding modes. Individualization of click settings, driving dynamics and more features can be adjusted.

The Öhlins Dashboard is standard on the Ducati 870 kits, and can be an option to the BMW 670/671 kits. More applications to come.

## MULTISTRADA 1200 MECHATRONICS KIT - DU 870

The complete kit to all Multistrada owners who want to update the bike from standard OEM suspension, into a full Öhlins semi active system. Consists of complete front fork, rear shock absorber, Öhlins Dashboard and the upgrade suspension control unit. Of course also with all necessary wiring, brackets, bits and pieces to make it fit the bike.

- TiN coated fork inner tubes, complete front fork
- Rear shock absorber with TTX technology and electronically
- Öhlins Semiactive suspension SCU
- Öhlins Dashboard for control
- All installation parts included

## BMW R 1200 GS MECHATRONICS KIT - BM 670/671

The successful mechatronics kit to the air cooled beamer is now being offered to all GS year models. Before the bikes needed to have ESA functions from the factory.

With the introduction of the Öhlins Dashboard as an accessory to the BMW kits, it can be fitted to any BMW R 1200 GS or GS adventure between 2004-2012. And ESA is no longer important.

- TTX technology shock absorbers
  - Semiactive functions, speed dependent setting
  - With ESA on the bike, it can be operated with the ESA button
  - Without ESA, the system is operated with the Öhlins Dashboard
  - The Öhlins Dashboard offers extended features to the rider compared to ESA
  - Öhlins Dashboard available during 2014.
- See [www.ohlins.com](http://www.ohlins.com)

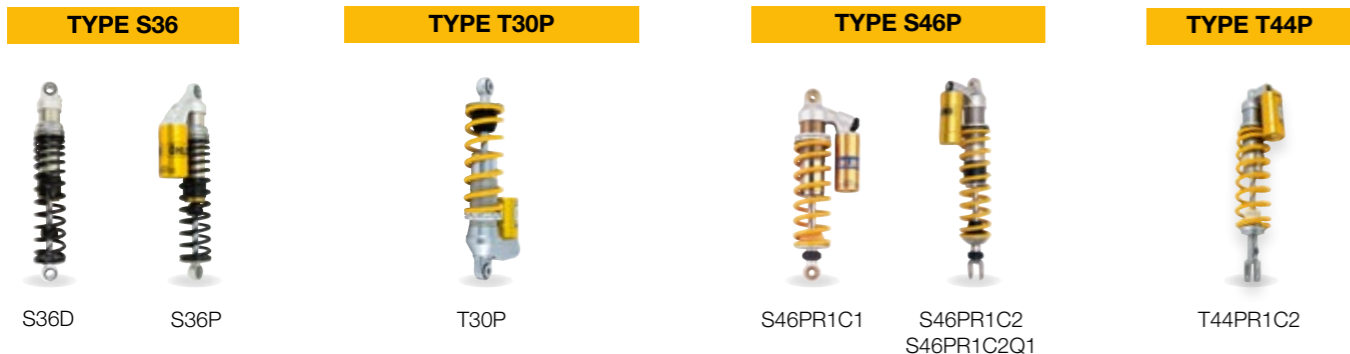

Model	Year	Part No	P/C	Description	Notes

\*Delivered without spring, must be ordered separately.

## TTX44 MX

Motocross and Enduro are the ultimate tests for the R&D department and it's where it all started for us. That is why we are so serious about it. The oil flows through two Öhlins Gold valves in the compression adjusters at the top of the shock. The TTX44 also includes the Öhlins cool tool.

- Twin tube design • Öhlins TTX technology • Rigid, fine precision rebound adjuster • Three level high speed adjuster • Highly effective low speed compression adjuster • Race type piston and pistonband • Dual spring kit available to most models • Available for all major MX and Enduro models • New surface treatment piston rod • Öhlins Cool tool

## STX46 MX

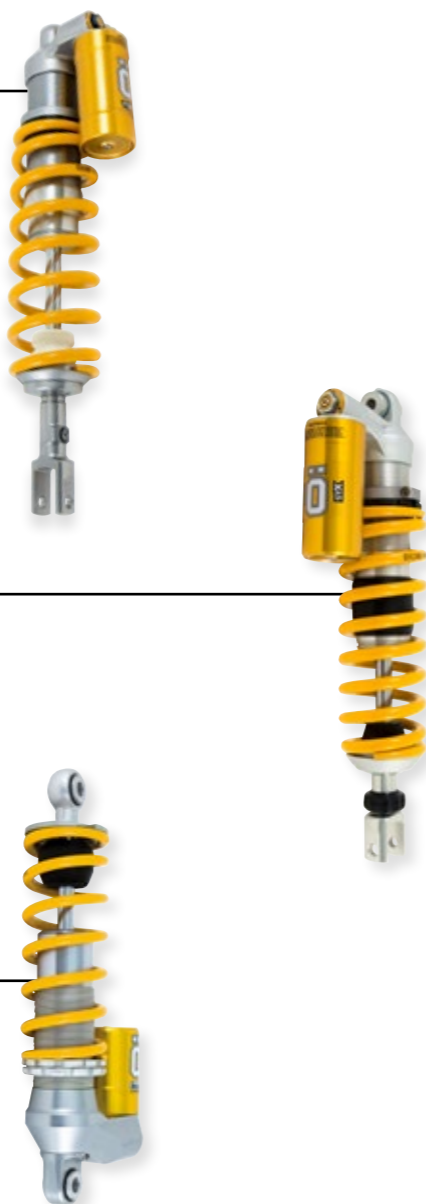

An updated 46 mm shock absorber from Öhlins, perfectly suited for 85cc bikes and OE applications. The 2-way compression adjuster is new and similar to the Öhlins TTX shocks for the larger bikes.

- Two way compression adjuster • Wide range of low speed compression adjustment, 3 click high speed • Improved dynamics, equals better function • Upgraded PDS function

## TTX30 MX

The Öhlins MX shock absorber for the 50/65 cc bikes, the first Öhlins TTX shock for the small bike segment.

- Öhlins TTX technology • Full maintenance and service capability • Size perfect for 50/65 cc bikes • Wide range of springs available

MX & ENDURO

# MX STEERING DAMPER 2.1

Since 1992, evolution of technological solutions has been added to the design throughout the years. The new steering damper is now equipped with a completely new valving system, eliminating any fluctuation of the damping characteristics depending on making a left or a right turn. The new UniFlow feature is actually a system that controls the flow of the hydraulic fluid into only

one direction hence the new fluctuation free damping curve. The system is also pressurized to compensate any temperature changes. The new easy way of mounting the damper broadens the list of MX bikes that can be fitted with this new model. Since 2013, the damper body is offered separately from the mounting kit.

- Damping Level Adjuster (DL) - Controls the general setup, including a high speed valve
- Return To Centre Adjuster (RTC) - Variable setup of the damping force on the return
- All aluminium casing
- Mounting Kit included
- Available for Honda, Kawasaki, KTM, Suzuki, Yamaha, Gas Gas, Husaberg and Husqvarna

ALL MODELS USES SAME DAMPER BODY SD 502

## SHOCK ABSORBER FLUIDS

Part No	Description	Viscosity cSt at 40° C	Contains	Application
00105-01	Shock absorber fluid	28,0	1 litre	For R&T shocks.
00105-04	Shock absorber fluid	28,0	4 litre	For R&T shocks.
00105-10	Shock absorber fluid	28,0	10 litre	For R&T shocks.
01304-01	High demand shock fluid	11,0	1 litre	For Car&Motorcycle offroad and MX & Enduro steering dampers.
01304-04	High demand shock fluid	11,0	4 litre	For Car&Motorcycle offroad and MX & Enduro steering dampers.
01309-01	Shock absorber fluid	19,0	1 litre	For R&T shocks and R&T Steering dampers.
01309-10	Shock absorber fluid	19,0	10 litre	For R&T shocks and R&T Steering dampers.

## FORKLEG CLAMPS FOR STEERING DAMPERS

Part No	Clamp Dimension	
	Forkleg Dimension	AxBxC
02235-01	Ø 38mm	38x32x16,5
02235-02	Ø 39mm	39x32,5x16,5
02235-03	Ø 40mm	40x33x16,5
02235-04	Ø 41mm	41x33,5x16,5
02235-05	Ø 42mm	42x34x16,5
02235-06	Ø 43mm	43x34,5x16,5
02235-07	Ø 44mm	44x35x16,5
02235-08	Ø 45mm	45x35,5x16,5
02235-09	Ø 46mm	46x36x16,5
02235-14	Ø 53mm	53x39,5x16,5
02235-15	Ø 53,5mm	53,5x39,75x16,5
02235-16	Ø 54mm	54x40x16,5
02235-17	Ø 55mm	55x40,5x16,5
02235-50	Ø 53mm	53x64x16,5

See page 35 for Universal steering dampers.

## FRONT FORK FLUIDS

Part No	Description	Viscosity cSt at 40° C	Contains	Application
01330-01	High performance FF fluid #5	20,04	1 litre	For MX cartridge forks.
01330-04	High performance FF fluid #5	20,04	4 litre	For MX cartridge forks.
01313-01	High performance FF fluid #5	23,0	1 litre	For cartridge forks.
01313-02	High performance FF fluid #5	23,0	1,4 litre	For cartridge forks.
01313-04	High performance FF fluid #5	23,0	4 litre	For cartridge forks.
01314-01	High performance FF fluid #10	40,0	1 litre	For cartridge forks.
01316-01	High performance FF fluid #20	98,0	1 litre	For non cartridge forks
01309-01	Front fork fluid	19,0	1 litre	For Öhlins R&T and MX forks.
01309-10	Front fork fluid	19,0	10 litre	For Öhlins R&T and MX forks.

## GREASE

Part No	Description	Contains	Application
00146-01	Öhlins red grease	100 gram	Multi purpose grease
00146-02	Öhlins red grease	400 gram	Multi purpose grease
00147-01	Öhlins white grease	100 gram	When overhauling shock absorbers
00147-02	Öhlins white grease	1000 gram	When overhauling shock absorbers
00159-01	Öhlins grease	400 gram	Multi purpose grease
00159-02	Öhlins grease	100 gram	Multi purpose grease

## RACE UPGRADES

Part No	Description
21740-03	Kawasaki ZX10R Race SCU OEM SD
22100-01	Honda CBR 1000RR SP (Öhlins OEM)
22100-02	Yamaha R1 2015 (Öhlins OEM)
22101-02	Extension kit FGR300 + 20mm

## MACHINED COMP. ADJUSTER KNOBS

Part No	Description
03253-01	Clear anodised
03253-02	Gold anodised

For the new generation of twin shocks and replacement for 00820-02 and 00820-03

## MACHINED PRELOAD ADJUSTER KNOBS

### MACHINED ADJUSTMENT KNOBS FOR HOSE TYPE

03617-01	Clear anodised
03617-03	Blue anodised

## R&T STEERING DAMPER RESERVOIR PISTON KIT

This kit is being used by racing teams in Moto GP, WSB and AMA. The kit is a big improvement when the steering damper is used in extreme racing conditions

Part No	Description
02280-01	To update older types of dampers with rubber reservoir.

## PRELOAD ADJUSTER

Part No	Description	Price
<b>HYDRAULIC</b>		
<b>INTEGRATED TYPE S46 SHOCK ABSORBERS</b>		
03645-01	2:1 Left	PC 2
03646-01	2:1 Right	PC 2
<b>INTEGRATED TYPE T36 SHOCK ABSORBERS</b>		
21681-01	2:1 Left	PC1
21681-02	2:1 Right	PC1
