SHOCK ABSORBERS FOR VESPA SPRINT 150 ABS, Primavera 150

PART NO: PI 801 • PI 802

Vespa Sprint 150 ABS and Primavera 150. This sporty and dynamic bike is not only for com-muting but also a bike you can really have fun with! Öhlins suspension will improve the performance of your suspension giving you better traction and control over the bike.

For front shock absorber, the STX 36 monotube high pressure gas type of shock absorbers with external "piggy back" reservoir, adjustable spring preload allows you to adjust the damper to suit your weight and riding style. You will feel improved comfort and traction wherever you ride.

For rear shock absorber, the STX 36 monotube high pressure gas type of shock absorbers with external "piggy back" reservoir, adjustable spring preload and compression damping allows you to adjust the damper to suit your weight and riding style. You will feel improved comfort and traction wherever you ride.
