APPLICATIONS FOR KTM 790 DUKE

PART NO S46DR1: KT 789 • PART NO S46HR1C1B: KT 790 • PART NO NIX 30 STREET: FKS 513

With its well proven monotube design, the Öhlins STX 46 shock absorber sets the standard for performance, quality and durability. As a major suspension upgrade for your sports bike, it features a large 46 mm main piston, an internal high pressure gas reservoir and rebound damping adjustment.

With the hose version you will also get compression damping adjustment and a hydraulic preload adjuster.

The NIX 30 Street cartridge kit features new designed black top caps to give the bike a more subtle look. The "NIX" technology is developed from high level racing such as WSBK to deliver the utmost performance on road as well as on track. Changing to the NIX 30 street cartridge kit is easy. It fits bolt on in the standard fork legs and gives you adjustable compression and rebound damping separated in each leg, as well as preload adjustment, all accessible from the black top caps.

FEATURES KT 789

- > Monotube shock absorber
- > Adjustable rebound damping
- > A range of spring rates available
- > Servicable and rebuildable

FEATURES KT 790

- > Monotube shock absorber
- > Adjustable compression and rebound damping
- > Hydraulic preload adjuster
- > A range of spring rates available
- > Servicable and rebuildable

FEATURES FKS 513

- > NIX-technology
- > External compression and rebound adjustment
- > External preload adjustment
- > 30 mm piston diameter
- > Range of springs available
- > Öhlins Setting Bank
