APPLICATIONS FOR KAWASAKI NINJA250/400

PART NO: KA 744 • FSK 133

Take full control over the road with Öhlins STX 36 shock absorber which sets the standard for performance, quality and durability. With a major suspension upgrade, rebound, compression, and length adjustment. The STX 36 shock absorber will let you ride with precision and stability to become one with the road.

Our STX-technology gives a smoother, more controlled and enjoyable ride. The series are monotube high pressure gas type of shock absorber with external "piggy back" reservoir. The technology works with an integrated temperature compensation, adjusting the systems performance to compensate for changes caused by temperature. This makes your ride more accurate and reliable.

The Öhlins STX 36 shock absorber sets the standard for performance, quality and durability for your Kawasaki Ninja250/400. Our trusted STX technology provides a confident and reliable ride with improved grip and stability for increased safety.

The Öhlins fork spring kit FSK 133 is an upgrade to the Kawasaki Ninja250/400 bike with upside down forks. Feel the improvement of handling, cornering and braking in every ride. Our kit gives you a higher performance, grip and stability. With the replacement top cap with preload adjustment, you can adjust it to fit just your ride.

Remark: Part number KA 745 recommended for race use (Race setting inside, Type S36PR1C1L)
