

OFF-ROAD & RALLY RAID

Polaris RZR 1000

The exciting Polaris RZR 1000 has been given an Öhlins upgrade.

Based on the high performing Öhlins ORQ-series a kit has been developed for the Polaris RZR 1000. The ORQ-series, tested and proved in the toughest of conditions, has been modified to fit this new exciting vehicle.

For the front ORQ 16/46-series shocks with the 16 mm shaft and a 46 mm piston has been developed, with the piggy back version for the strongest solution as well as for excellent cooling effect. Its coupled with the robust and strong ORQ 18/50 at the rear with the 18 mm shaft and 50 mm piston. Both front and rear shock absorbers comes with helper and main springs included.
