Fluid Volume (each leg)	0,420 litre

Fluid volume range (each leg) 0,350 - 0,450 litre
Öhlins Front Fork fluid 01330-01

Hydraulic Stop Cup

FGMA 1895 Cartridge kit comes with an Öhlins hydraulic stop cup and a fork bottom seal platform. This requires removal of the inner tube from the fork bottom on both fork legs.

OEM seal/platform/ hydraulic stop cup (one piece) shall be removed. Seal platform with o-rings shall be installed between 50mm inner tube and fork bottom and the Öhlins hydraulic stop cup shall be installed together with the base plug.

Spring Recommendation

Cartridge Kit FGMA 1895 shall be used together with Öhlins Front Fork Springs part no. 08784-xx.

The fork springs need to be ordered separately depending on the rider's choice of spring rate.
