Shock Absorber for Harley Davidson XR1200

HD 908

Mounting Instructions

⚠ Warning!

It is advisable to have an Öhlins dealer install the shock absorber.

When installing, consult your Vehicle Service Manual.

1

Put the motorcycle on a workstand so that the rear wheel barely touches the ground.

⚠ Warning!

Make sure the vehicle is securely supported so that it will not tip.

2

Remove the original shock absorbers. Consult your Vehicle Service Manual.

👁 Note!

Before installing the Öhlins shock absorber clean the vehicle thoroughly.

3

Install the Öhlins shock absorbers in the same way as the original units. The shock absorber should be installed with the cylinder head at the top and the reservoir towards the rear. Use the washers and sleeves provided in this kit.

👁 Note!

Lower the motorcycle so that the shock absorber is slightly compressed, before tightening the screws.

👁 Caution!

Make sure that all screws are tightened to the correct torque and that nothing fouls or restricts movement of the shock absorber when the suspension is fully compressed or extended.

⚠ Warning!

Before riding, always make sure that the basic settings made by Öhlins are according to recommended Set-up Data. Read about adjustments and setting up in the Öhlins Owner's Manual before you make any adjustments. Contact an Öhlins dealer if you have any questions about setting up the shock absorber.

👁 Caution!

The drive belt tension shall only be adjusted when the original shock absorber is installed on the vehicle.

Set-up Data

Recommended set-up

Spring Preload	23 mm
Shock Absorber Length	360 ± 10 mm
Stroke	97
Free spring length	230 mm
