👁 Note!

Please note that there can be small differences between your product and the images in these instructions.

👁 Note!

Please note that during storage and transport, especially at high ambient temperature, some of the oil and grease used for assembly may leak and stain the packaging. This will not cause damage to the product, wipe off the excessive oil or grease with a cloth.

👁 Note!

Before you install this product, check the kit contents. If anything is missing, please contact an Öhlins dealer.

⚠ Warning!

Before you install this product, read the Öhlins Owner's manual. This product is an important part of the vehicle and the vehicle stability.

Shock absorber Kit for Porsche 991 Carrera & Carrera S

Fits: Sport chassis with PDCC, Sport chassis without PDCC, Standard chassis without PDCC

POS MP70 front

Mounting Instructions

MOUNTING INSTRUCTIONS

⚠ Warning!

We strongly recommend to let an Öhlins dealer install this product.

⚠ Warning!

If you work with a lifted vehicle, make sure that it is safely supported to prevent it from tipping over.

👁 Note!

When you work with this product, see the vehicle service manual for vehicle specific procedures and important data.

👁 Note!

Before you install this product clean the vehicle.

1

Raise the vehicle and put it on jack stands.

2

Remove the front wheels.

3

Loosen the bolts for the lower strut attachments.

👉 Caution!

Support the wheel hubs in an appropriate way on each side of the vehicle so that the brake hoses can not be damaged.

4

Loosen the upper attachments. Remove the original struts from the car.

5

Cut the dust boot 62 mm from the lower end with a pair of scissors according to fig 2.

6

Fit the sleeve (1), the dust boot (3), the spring (4), the spacer (5), the upper spring seat (6) the OE top mount, the OE washer and the M14 lock nut (7) to the strut according to figure 1.

Tighten the lock nut (7) to 35 - 40 Nm and install the adjustment knob and tight it carefully.

👁 Note!

When tightening the top mount nut, the shock absorber shaft must be held in position with a 6 mm Allen key.

Fig 1

Fig 2

MOUNTING INSTRUCTIONS

7

Adjust the spring seat and the lock ring according to fig 5 and tighten to 50 - 60 Nm.

Note!

Sport chassis with PDCC: Install OE sway bar bracket and adjust the heights according to figure 4.

Sport chassis without PDCC: Use heights according to figure 5 and measurement $X = 90$ mm.

Standard chassis without PDCC: Use heights according to figure 5 and measurement $X = 35$ mm.

8

Fasten the upper attachments to the vehicle.

9

Adjust the height adjuster lock ring according to figure 5 and tighten to 40 - 50 Nm.

Sport chassis with PDCC: Remove the height adjustment lock ring according to figure 4.

10

Raise the wheel hub with a jack to remove the freeplay of the lower strut attachment bolts before tightening them.

Note!

Make sure that all bolts are tightened to the correct torque and that nothing fouls or restricts movement of the strut when it is being fully compressed or extended. Test this over the whole steering range from lock to lock.

11

Make sure that all removed parts are reinstalled in the same way as they were before the installation of the Öhlins shock absorber.

Note!

If the vehicle is equipped with OEM PASM shock absorbers, use Öhlins cancellation kit.

ADJUSTMENTS

⚠ Warning!

Before you ride/drive, always make sure that the setup is according to the recommended setup data. Read about adjustments and setting up in the Öhlins Owner's Manual before you make any adjustments. Contact an Öhlins dealer if you have any questions about setting up.

The preload is 3 mm from a free length of 200 mm, giving 197 mm installed length, see fig 5.

SETUP DATA

Recommended set-up

Setting		
Track	2-7	clicks
Winding road	5-10	clicks
Street	10-20	clicks
Spring preload	3	mm
Shock absorber length	516	mm

Recommended spring

48010-19 (70 N/mm)

The actual vehicle height

With both the preload and height adjustments in their standard positions, the vehicle is lowered approximately 10 mm when compared to the original suspension. As the height adjuster is turned one rotation, the position moves 1.5 mm.

⚠ Warning!

The adjustment range is the standard position ± 15 mm.
