Shock Absorber Kit for Ford Ranger T6 - Front

FOV 1W00 FOV 2W00

Mounting Instructions

⚠ Warning!

It is advisable to have an Öhlins dealer install the shock absorber.

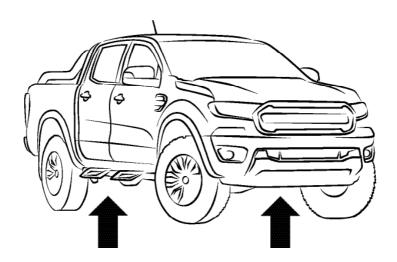

If working on a raised vehicle, ensure it is securely supported so that it will not tip over.

Note!

Before mounting this product clean the vehicle thoroughly.

Note!

When working on this product, always see the Vehicle Service Manual for vehicle specific procedures and important data.

1

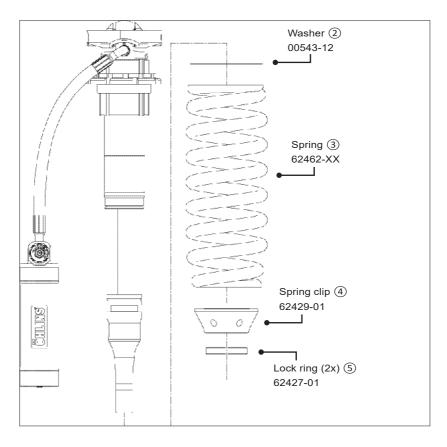

Lift the vehicle by using a suitable car lift.

Note!

Please refer the chassis lifting point in the vehicle service manual.

2

Remove the front wheels.

3 Spring Installation

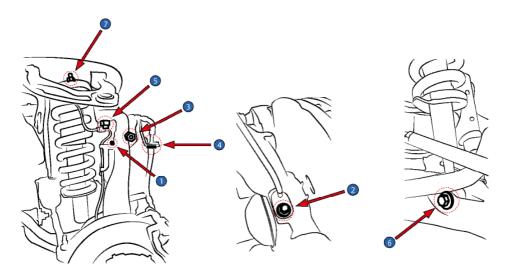

- 3.1 Pre-compress the spring by using a spring compressor.
- 3.2 Install the washer (2) underneath the spring seat.
- 3.3 Install the spring (3) onto the damper body.
- 3.4 Install the spring clip (4) thru the end-eye and lock it in place by using the 2 lock rings (5).
- 3.5 Release the spring from the spring compressor making sure that the spring clip and the lock rings are seated properly.

Note!

When installing the springs, reservoir hose and rebound adjuster must be pointed toward the front of vehicle

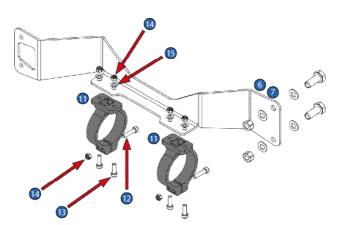

Note!

For spring recomendation and preload see page 6.

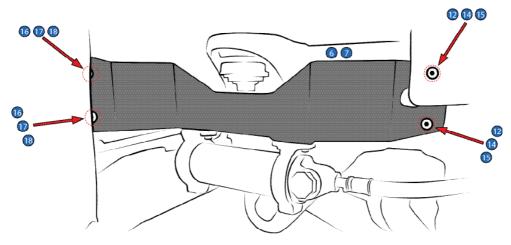

4 Remove OEM Shock Absorber

- 4.1 Loosen the wiring cable bracket (1), and speed sensor (2).
- 4.2 Loosen the anti-rollbar link (3) and disconnect it from the upright.
- 4.3 Release the brake line clamp (4).
- 4.4 Disconnect the upper control arm from the upright by loosening the balljoint nut (5).
- 4.5 Loosen the lower mounting screw 6.
- 4.6 Loosen the 3 top mount nuts 7 then remove the OEM front shock absorbers from the car.

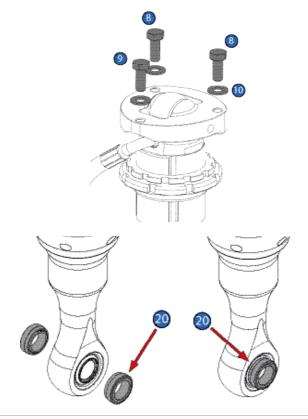

5 Reservoir Bracket

- 5.1 Install 2 reservoir clamps (11) on the reservoir brackets (6) and (7) using respectively 4 screws (13), washers (15), and lock nuts (14).
- 5.2 Mount the reservoir clamps (11) with the lock nuts (14) toward inside of the vehicle.

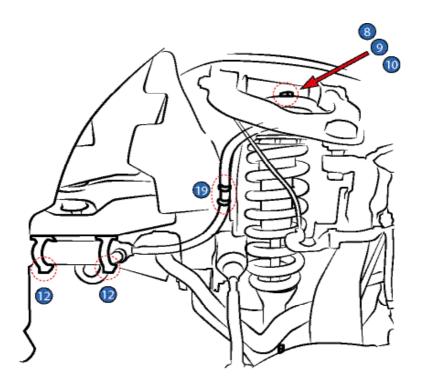

5.3 Assemble the reservoir brackets (6) and (7) on each side of the car.

Note!

Secure the hose to prevent it from getting in contact with any moving parts

6 Instali Uniins Snock Absorber

- 6.1 Install Ohlins shock absorber by placing the end eye in the lower arm and then the top mount in the brace.
- 6.2 Tighten the top mount screws (8) and (9), with washers (10) supplied with the kit. Tightening torque at 44 Nm.
- 6.3 Reverse all the procedures as necessary. Tighten at torque values secified in the vehicle service manual.
- 6.4 Install the reservoirs in the clamp brackets and tighten the 2 screws (12) with tightening torque at 10 Nm.
- 6.5 Use the edge clips with cable ties (19) to fix the hose in position on the chassis.

Note!

Secure the hose to prevent it from getting in contact with any moving parts

ADJUSTMENTS

Before driving, always make sure that the basic settings made by Öhlins are according to recommended Set-up Data. Read about adjustments and setting up in the Öhlins Owner's Manual before you make any adjustments. Contact an Öhlins dealer if you have any questions about setting up.

Note!

Apply the multi-purpose oil to preload adjuster when preload adjustment needed.

Note!

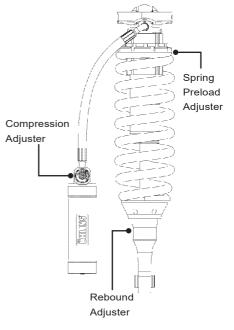

Recheck the vehicle wheel alignment after installed.

Shock Absorber Kit for Ford Ranger T6 - Rear

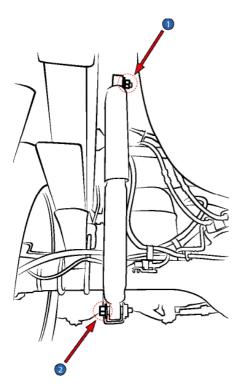

FOV 6W00

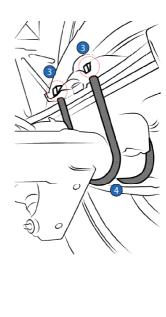

Mounting Instructions

Caution!

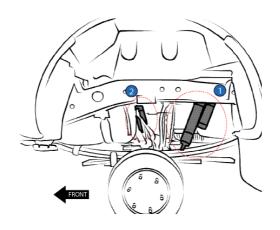

Before removing the rear shock absorbers and U bolts, please make sure to secure the rear axle.

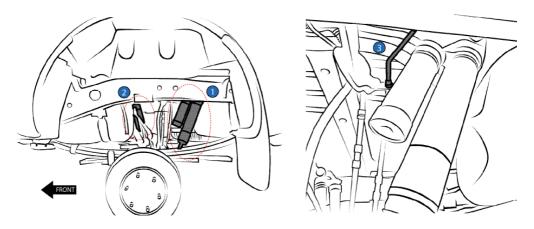

1 Remove OEM Shock Absorber

- 1.1 Remove the OEM shock absorbers from the car loosening nut ① and screw ②.
- 1.2 Loosen the 4 nuts (3) then remove the U-bolts (4).

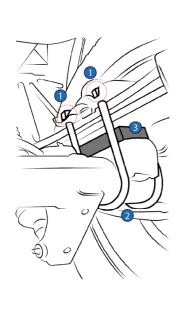

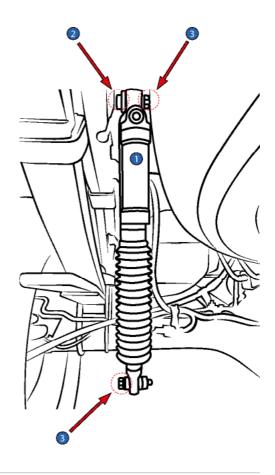

Note!

The orientation of rear shock absorbers may be different between car models

2 Ohlins Shock Absorber Orientation

- 2.1 On the model without extra fuel tank, both shock absorbers ① and ② are oriented with the reservoir toward the rear of the vehicle.
- 2.2 On the model with dual fuel tank, the left shock absorber ① is oriented with the reservoir toward the front of the vehicle.
- 2.3 In the condition of 2.2, the brake line ③ needs to be pushed forward to avoid interferences with the reservoir.

Note!

U-bolts are not supplied in the kit. Please ask Öhlins dealers for recommendation.

3 Install Ohlins Shock Absorber

- 3.1 Install the lift blocks (3) that supplied in the kit between the leaf spring and the rear axle.
- 3.2 Replace the new 25 mm longer U-bolts ② then tighten 4 nuts ① with torque value as specified in the vehicle service manual.
- 3.3 Install the spacer (2) that supplied in the kit over the top mount pin. (Internal chamfer towards the chassis:
- 3.4 Install the Ohlins shock absorber (1) then tighten nuts and screws ③ at torques specified in the vehicle user manual.

ADJUSTMENTS

Before riding, always make sure that the basic settings made by Öhlins are according to recommended Set-up Data. Read about adjustments and setting up in the Öhlins Owner's Manual before you make any adjustments. Contact an Öhlins dealer if you have any questions about setting up.

Note!

Recheck the vehicle wheel alignment after installed.
