

Note!

Please note that there can be small differences between your product and the images in these instructions.

Note!

Please note that during storage and transport, especially at high ambient temperature, some of the oil and grease used for assembly may leak and stain the packaging. This will not cause damage to the product, wipe off the excessive oil or grease with a cloth.

Note!

This product may interfere with the filter box and air intake channel on this bike. The interference is mainly between the spring and the above mentioned components. The interference is equal in comparison to that of the stock spring. None of the interference is harmful to the shock absorber and/or the motorcycle function.

Kit Contents

| Description | Part No | Pcs |
|--|----------|-----|
| Shock absorber | YA 1993 | 1 |
| Spring clip | 15087-02 | 1 |
| Owner's manual | 07253-04 | 1 |
| Sticker Öhlins | | 1 |
| Sticker service schedule MX fork & shock. | 15211-01 | 1 |

Note!

No spring included in this kit. See the spring guide in this folder or contact an Öhlins dealer for advice.

Note!

Before you install this product, check the kit contents. If anything is missing, please contact an Öhlins dealer.

Warning!

Before you install this product, read the Öhlins Owner's manual. This product is an important part of the vehicle and the vehicle stability.

TTX Flow shock absorber for Yamaha YZ 250F

YA 1993

Mounting Instructions

MOUNTING INSTRUCTIONS

Install the Shock Absorber

Warning!

We strongly recommend to let an Öhlins dealer install this product.

Warning!

If you work with a lifted vehicle, make sure that it is safely supported to prevent it from tipping over.

Note!

When you work with this product, see the vehicle service manual for vehicle specific procedures and important data.

Note!

Before you install this product clean the vehicle.

1

Put the motorcycle on a work stand so that the rear wheel barely touches the ground.

2

Refer to the vehicle manual to install the Öhlins shock absorber.

3

Use screw 15209-10 for the lower fastening point.

Note: Torque to 40Nm

Note!

Lower the vehicle so that the suspension is slightly compressed before you tighten the screws.

Caution!

Make sure that you tighten all screws to the correct torque and that nothing fouls or restricts movement of the shock absorber/front fork/steering damper when the suspension is fully compressed or extended.
