AUTOMOTIVE TTX FLOW

The Öhlins Flow-technology is now available to our customers in the Rally and Rallycross market. With our TTX-technology and patent-pending internal pressure regulation, this new shock is a step forward compared to other shock absorbers. We retained our TTX-technology but redesigned the 'check-valve' system to balance wide valve openings and quick open/close actions to handle a large volume of oil flow.

The Automotive TTX Flow gives the car improved traction, comfort and predictability which enhance the stability of the car. It's also easy to adjust to find the perfect setting for the stage and driving style. The base model comes equipped with a general damping adjuster on the shaft and a low-speed compression adjuster on the cylinder head.

FEATURES

- > TTX-technology
- > Patent pending pressure technology
- > 46 mm piston
- > PDS (Progressive Damping System)
- > Modular based
- > Wide range of springs
