

ATV Shock Covers

Yes... almost everything funny in life has to do with dirt, mud and tons of gravel. When it comes to serious racing during rough conditions you have to take extra care of your high performance shock absorbers.

To prevent dirt, dust and mud from clogging up your absorber you can dress it up with our new "collection" of protectors.

The flexible neoprene material is an effective blocker... and yes... it fits almost all shock absorbers on the market but we don't care. We want all of you off-road enthusiasts to have well performing suspension, no matter what brand you have on your ATV.

FEATURES:

- 3mm Neoprene material.
- Easy installation with elastic seam and velcro fitting.
- Black with white printing.
