

## Road&Track by Öhlins

*The all new Porsche Club Race package is a pure racing breed with its DNA inextricably linked to our enviable motorsport expertise at Öhlins Racing.*

*The package is a unique combination of a 46 mm, two-way adjusted front mounted shock and a light weight 36 mm shock with an integral reservoir in the rear.*

The TTX46 MT Club Race Strut has a forged cylinder head and is two-way adjusted, which separates it from the TTX46 MT. As the piston is solid, all adjustments are made through these adjusters. Use the TTX46 MT Club Race together with the TTX36, they make a perfect match. The TTX36 is a Twin Tube piggy back damper, two-way adjusted, one-way rebound and one-way compression. One of the advantages with this damper is the integral reservoir that makes it very compact.

### TTX46 Club Race Features

- 46 mm solid piston twin tube through rod damper
- 30 mm shaft
- Compression and Rebound adjusters
- Fully pressure balanced
- High end performance at a mid-range price

### TTX36 INLINE FEATURES

- 36 mm solid piston twin tube damper
- 14 mm solid shaft
- Compression and Rebound adjuster
- Fully pressure balanced
- High end performance at a mid-range price

### Part Numbers

TTX46 front POF5J01
