ADVANCED TRACKDAY & MOTORSPORT

PRODUCT NEWS

AUDI R8 2015-2019

PART NO: AUV MT00 • **CHASSIS CODE:** 2nd GENERATION, TYPE 4S

The Öhlins product line Advanced Trackday & Motorsport is the ultimate choice for track day fans.

Developed in international high-level racing with proven success over many years, our dedicated twin tube technology (TTX) grants maximum performance and reliability. Each product is designed and tuned for the individual car model. With separate adjustability in compression and rebound damping as well as spring preload, the TTX shock absorbers provide a wide range of setup possibilities to meet the individual drivers needs.

To enable all-season usage on public roads, all of our coil over suspension kits have been through vast corrosion tests to meet the ISO 9227 standards. The result is a worldwide 2-year limited warranty on all of our automotive products.

GENERAL FEATURES

- > TTX-technology
- > Serviceable and rebuildable
- > Corrosion salt spray tested (ISO 9227)
- > Height adjustable
- > 2 years limited warranty
