APPLICATIONS FOR HONDA PCX160

PART NO: HO 112 • **PART NO:** FSK 136

The Öhlins STX 36 for the Honda PCX160 is a monotube high pressure gas type of shock absorber with external “piggy back” reservoir. With adjustable rebound damping, and spring preload you can change the damping characteristics of your bike whether you are riding on the track or trails. Öhlins STX 36 gives the rider improved handling, stability and cornering which improves overall performance and rider confidence. Supply with alternative springs in box.

The Öhlins fork spring kit FSK 136 is an upgrade for Honda PCX160 bike with conventional forks. The kit is designed to improve handling, cornering; braking and give the rider a noticeable improved feeling in all areas. The kit consists of a replacement top cap and higher performance rate springs. Öhlins FSK kits are a cost effective way to upgrade the front end of your bike. Supply with alternative springs in box.
