APPLICATIONS FOR YAMAHA MT-09 (FZ-09) 2021-

PART NO NIX 30 STREET: FKS 518**PART NO STX 46 HOSE:** YA 569 • **PART NO STX 46:** YA 570

The Öhlins effect is remarkably noticeable with the NIX 30 cartridge kit in how the kit controls compression damping in the left leg and rebound damping in the right leg. It offers stable handling, cornering and braking characteristics, contributing to safety and boosts rider confidence. The NIX 30 is adjustable at the top of each fork leg and you can also change the spring preload, so you can set-up the bike as you want it.

For the rear end, Öhlins has developed two STX 46 shock absorber options. The slim version is cost effective but still delivers the Öhlins characteristics and features a monotube shock design with internal gas reservoir and dividing piston. With adjustable rebound damping you can tune the characteristics of the shock.

Option two is the Öhlins STX 46 Monotube shock with hose mounted gas reservoir. With adjustable compression and rebound damping you have the ability to really change the characteristics of the bike. With the hydraulic spring preload adjuster you can change the stance of your bike to accommodate for extra weight!

NIX 30 STREET CARTRIDGE KIT FEATURES

- > Compression, rebound and spring preload adjusters
- > Easy to change settings for individual preferences
- > Wide range of spring rates available
- > Easy to install and service
- > 30 mm piston diameter

STX 46 HOSE SHOCK ABSORBER FEATURES

- > Monotube shock absorber with hose mounted external reservoir
- > Adjustable compression and rebound damping
- > Hydraulic spring preload with remote adjuster
- > Serviceable and rebuildable
- > 2 years warranty
