SHOCK ABSORBER HONDA CBR250RR

PART NO STX 36: HO 709

Öhlins STX 36 for the Honda CBR250RR comes with monotube high pressure gas type of shock absorber with external "piggy back" reservoir. With adjustable compression and rebound damping you can change the damping characteristics of your bike whether you are riding on road or track. The Öhlins STX 36 gives the rider improved handling, stability and cornering which improves overall performance and rider confidence. This unit has been throughly track tested for the ultimate ride when on the limit.

Öhlins design, full maintenance capability. Setting library available through every Öhlins service center. Alternative springs rates available. (Sold separately)
