# APPLICATIONS FOR TRIUMPH STREET TWIN (2016-2018)

**PART NO : TR 633 • PART NO : FSK 117**

Improve your Triumph Street Twin suspension system with Öhlins STX 36 rear twin emulsion type of shock absorbers, blackline edition for an authentic look. Better comfort and traction with rebound damping and length adjustment. Improved overall performance and riding confidence.

Öhlins FSK 117 kit for Street twin improves the performances of the standard front fork. Amongst the advantages with this design is the improved chassis balance, cornering and stability under braking. A preload adjuster is located at the top of each fork leg to match rider preferences. The parts included in this FSK kit will easily fit inside the original front fork and are easy to install.
