

# Öhlins Professional Motorsport Products Automotive TTX Flow TTX46RX

The Öhlins Flow-technology is now available to our customers in the Rally and RallyX market. With our TTX-technology and patent-pending internal pressure regulation, this new shock is a step forward compared to other shock absorbers. We retained our TTX-technology but redesigned the 'check-valve' system to balance wide valve openings and quick open/close actions to handle a large volume of oil flow.

The Automotive TTX Flow gives the car improved traction, comfort and predictability which enhance the stability of the car. It's also easy to adjust to find the perfect setting for the stage and driving style. The base model comes equipped with a general damping adjuster on the shaft and a low-speed compression adjuster on the cylinder head.

## Technical Specifications

TTX-technology

Patent pending pressure technology

46 mm piston

PDS (Progressive Damping System)

Modular based

Wide range of springs

## Available Applications

ALR 0T71: Overall length 582 mm, Stroke 195 mm

ALR 0T72: Overall length 631 mm, Stroke 218 mm

ALR 0T73: Overall length 708 mm, Stroke 256 mm

## Part number

ALR 0T71, ALR 0T72, ALR 0T73

# Price and availability

## Price on request

To purchase this product please contact an authorized Öhlins dealer or service center.
