

# Öhlins Off-Road & Adventure Suspension SUV MU10 for Suzuki Jimny (FJ)

We designed our suspension for the Adventure segment with Off-Road and Rally-raid in mind, to put the excitement back in the winding countryside roads and rough terrain. Our suspension gives you better contact with the road, improves sharp turns, and stays stable during hillsides. The adjustable damping makes it possible for you to adjust your suspension depending on the road ahead to fit your drive. With more traction and control it's possible to use larger tires for steeper terrain no matter if you're going through muddy water or climbing overland. They are also improving the ride comfort in common roads, which makes these products a perfect match!

## General Features:

- (Öhlins ORQ 16/46 Off-Road technology)
- Fully rebuildable dampers
- Corrosion salt spray tested (ISO 9227)
