

Öhlins Professional Motorsport Products TTX 25 MkII FSAE 200/57 mm

Öhlins understands the importance of relationships from beginning to end, from racers in training to experienced veterans. It's for this reason that we developed the TTX 25 MkII FSAE - a shock absorber specifically for Formula SAE/Formula student racing.

The TTX 25 MkII FSAE uses our well-proven twin tube technology, in a small package. The 4-way externally adjustable damper is completely serviceable and offers the possibility for setting changes. With a wide range of springs together with dynamometer plots, CAD models, and other technical information, the TTX25 FSAE provides the perfect package for Formula Student racing teams.

Technical Specifications

Overall length: 200 mm (center to center of spherical bearings, fully extended)

Stroke: 57 mm

Weight: 394 g (without spring)

Spherical Bearing dimensions

Inner diameter: 8 mm
