

# Öhlins TTX36/TTX39 EC Adventure Shock Absorber DU 871

By using Öhlins TTX shock absorbers and the technology on front forks, we can add electronic adjustments to the motorcycle suspension.

To make a true improvement, the algorithms used to control the chassis balance, needs to be at a very sophisticated level. Since we develop our own software based on motorcycle chassis knowledge since 40 years, we can make true semi active suspension to more and more bike models. It is as if you had an Öhlins technician onboard during the ride, adjusting the clickers.

We also develop our own suspension control units (SCU) as well as our own Man Machine Interface (MMI) – the Öhlins Dashboard.

## Part number

DU 871

## Notes

We recommend the installation through an authorized Öhlins Service Center.

## Fits for vehicles

[Ducati Multistrada 1200 \(2010 – 2012\)](#)

Without "Teilegutachten" (Germany)

## Price and availability

**4.475,00 €**

3.760,50 € plus 19% VAT ()

**Not in stock**

To purchase this product please contact an authorized Öhlins dealer or service center.
